Saskatchewan Conservation Data
Centre

What is iMapInvasives?

An online invasive species mapping tool and database for Saskatchewan:

- Land Managers and FNBs
- Weed Inspectors and RMs
- Researchers
- Citizen Scientists
- Educators

Designed to share and manage invasive species information.

Why use iMapsInvasives?

- Free
- Anyone can sign up for an account
- Mobile app allows for direct upload from the field
- Email alerts – Early Detection Rapid Response
- **Store and share data about prohibited and noxious weeds across the province**
 - Includes species maps, treatment efforts/ effectiveness, and areas searched.

Using the App

Create an Observation

Records to Upload: 0

Create an Observation

Take Photo Using Camera

Select Photo From Library

Species: Custom List

Leafy Spurge

Take a photo

Can take photo in app or use one from library

1 photo per observation

Use a **good photo** where identifying features of the plant are visible

Higher resolution images take longer to download (set camera resolution to 1Mb or less)

Create an Observation

Species: Custom List

Leafy Spurge

Species Detected

Species Not Detected

Date:

Jun 4, 2020

GPS: Uncheck to manually move location

Satellite

Viewing the map requires an internet connection, if you do not see the map check your connection and restart iMapInvasives Mobile.
GPS will work without the map. [GPS Accuracy: 0005 m](#)

Select species

Choose whether species is present or not present

Date is default to current date

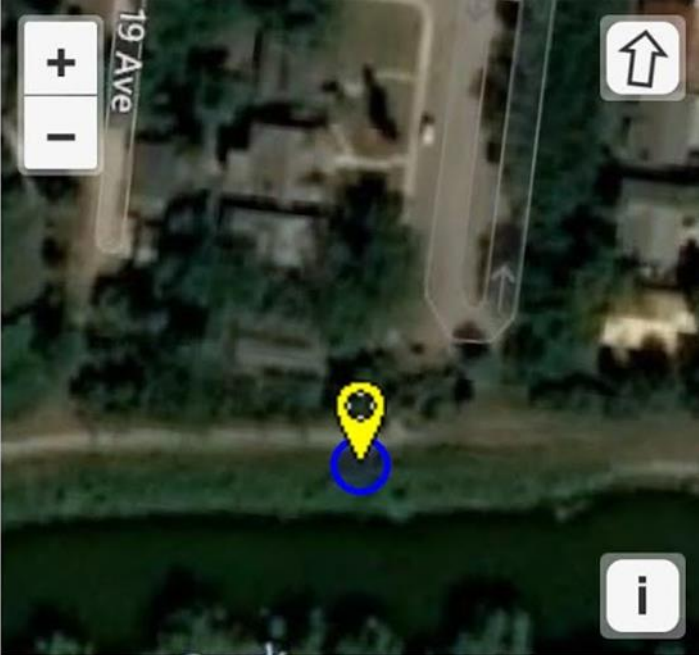

Map set to default preference but can change between satellite and road

Create an Observation

GPS: Uncheck to manually move location

Satellite

Viewing the map requires an internet connection, if you do not see the map check your connection and restart iMapInvasives Mobile.
GPS will work without the map. GPS Accuracy: 0010 m

Location (Longitude, Latitude):

-104.6203921, 50.4362721

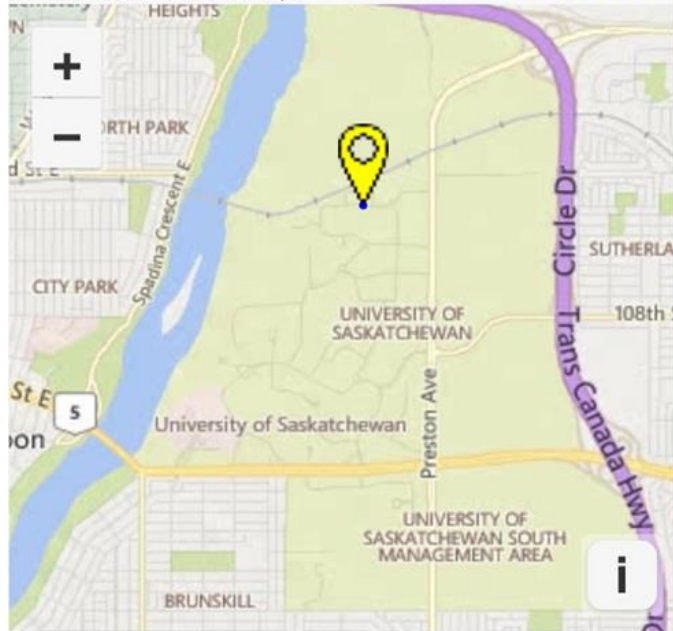

Let device collect location automatically or manually place point

Double check location and accuracy

Create an Observation

Viewing the map requires an internet connection, if you do not see the map check your connection and restart iMapInvasives Mobile.

GPS will work without the map. GPS Accuracy: 5051 m

Location (Longitude, Latitude):

-106.6282864, 52.1422426

If the map is not visible, your phone probably does not have connectivity (or did not at the time the app was opened). If your GPS is enabled, the coordinates should still reflect your location.

OR

Manually place the point: Make sure to uncheck the GPS box just below the date field, then hold your finger on the point for 2 seconds to move to your desired location.

Create an Observation

iMap 3 Project: (Optional)

iMap 3 Organization: (Optional)

Time Searched (in minutes):

Size of area containing invasive:
(or type precise area with units into
Comments box)

Up to 10 sq. meters

Up to 0.5 hectare (5,000 sq. m)

Up to 1 hectare

More than 1 hectare

Select Project if you want observation associated with a specific project

Select organization if you want observation associated with a specific organization

Enter time searched if applicable

Select the approximate size of the patch

Create an Observation

Distribution of invasive:

Dense plants/clumps ▼

Observation Comments:

Save Cancel

Trace (Single plant/clump)
Sparse (Scattered plants/clumps)
Dense plants/clumps
Monoculture
Linearly scattered (e.g. along roa...

Select the distribution of the invasive

Enter any additional information in comment box (optional)

When satisfied with observation select “Save”

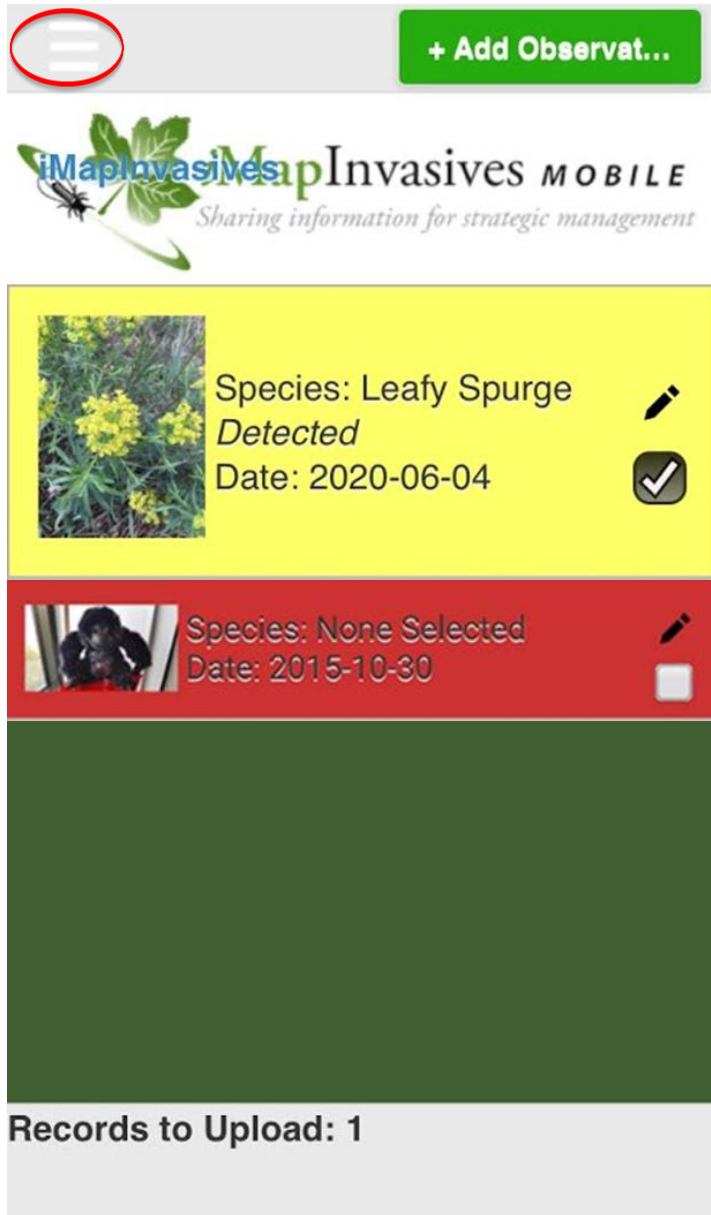

Upload Observation

After creating observation, it needs to be uploaded to the iMapInvasives database online

Requires Wi-Fi or data connection (recommended to wait until you are connected to Wi-Fi)

Upload Observation

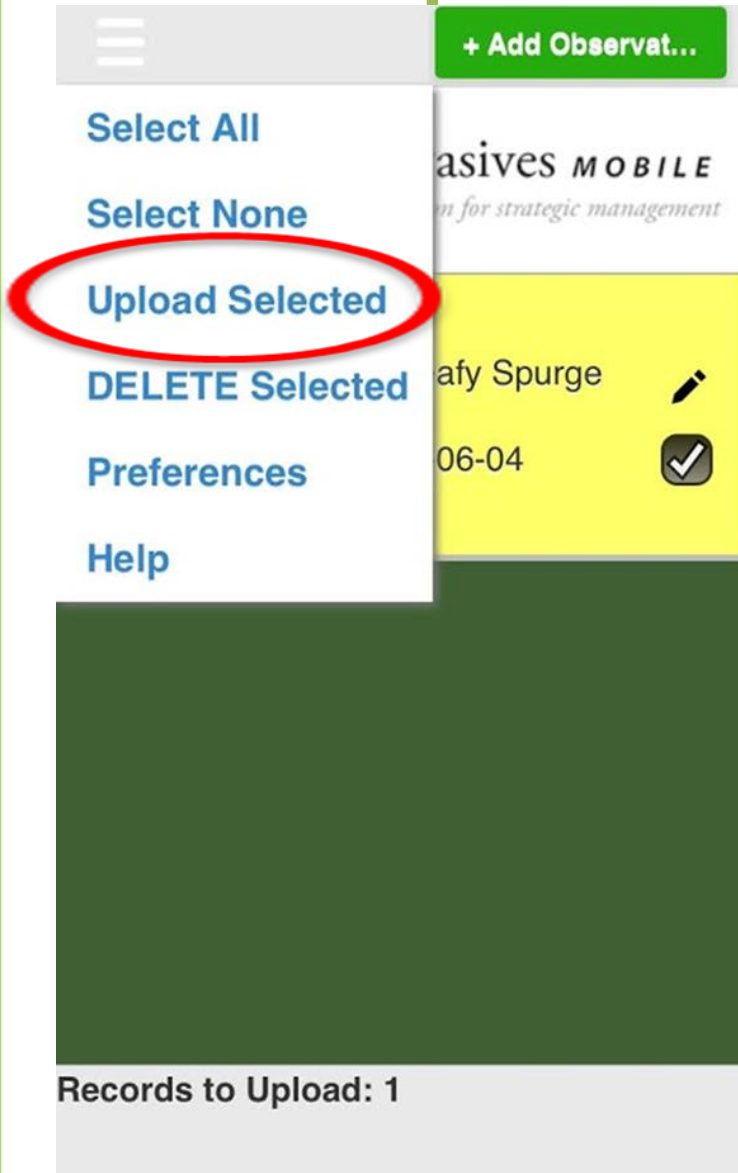

The screenshot shows the iMapInvasives MOBILE app interface. At the top, there is a grey header with a red circle around a hamburger menu icon on the left and a green button labeled "+ Add Observat..." on the right. Below the header is the app logo, which includes a green leaf and a black insect, with the text "iMapInvasives MOBILE" and the tagline "Sharing information for strategic management". The main content area displays two observation records. The first record is on a yellow background, showing a photo of yellow flowers, the text "Species: Leafy Spurge Detected", the date "Date: 2020-06-04", a pencil icon for editing, and a checkmark icon for completion. The second record is on a red background, showing a photo of a person, the text "Species: None Selected", the date "Date: 2015-10-30", a pencil icon, and a white square icon. At the bottom of the screen, a grey bar displays the text "Records to Upload: 1".

Yellow = completed observation

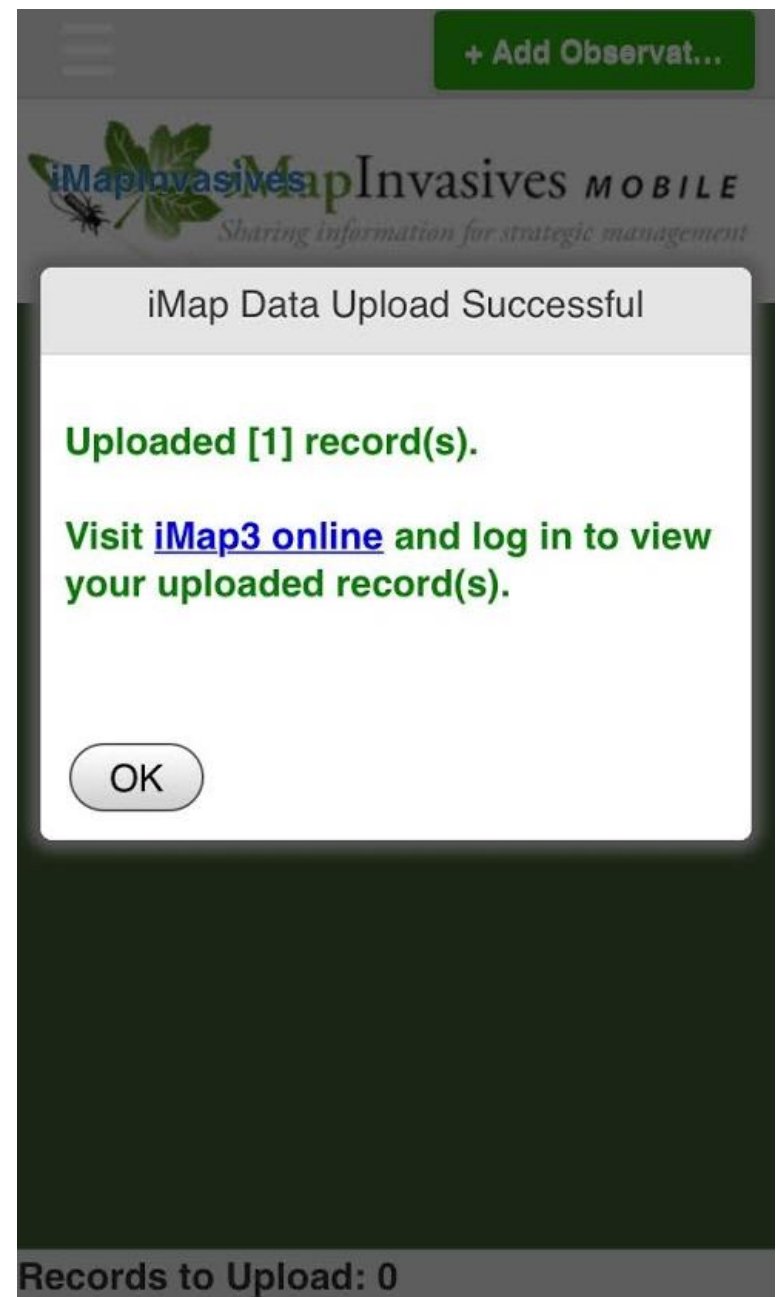

Red = incomplete observation

Newly created observation(s) are located in the homepage, select the ones you want to upload

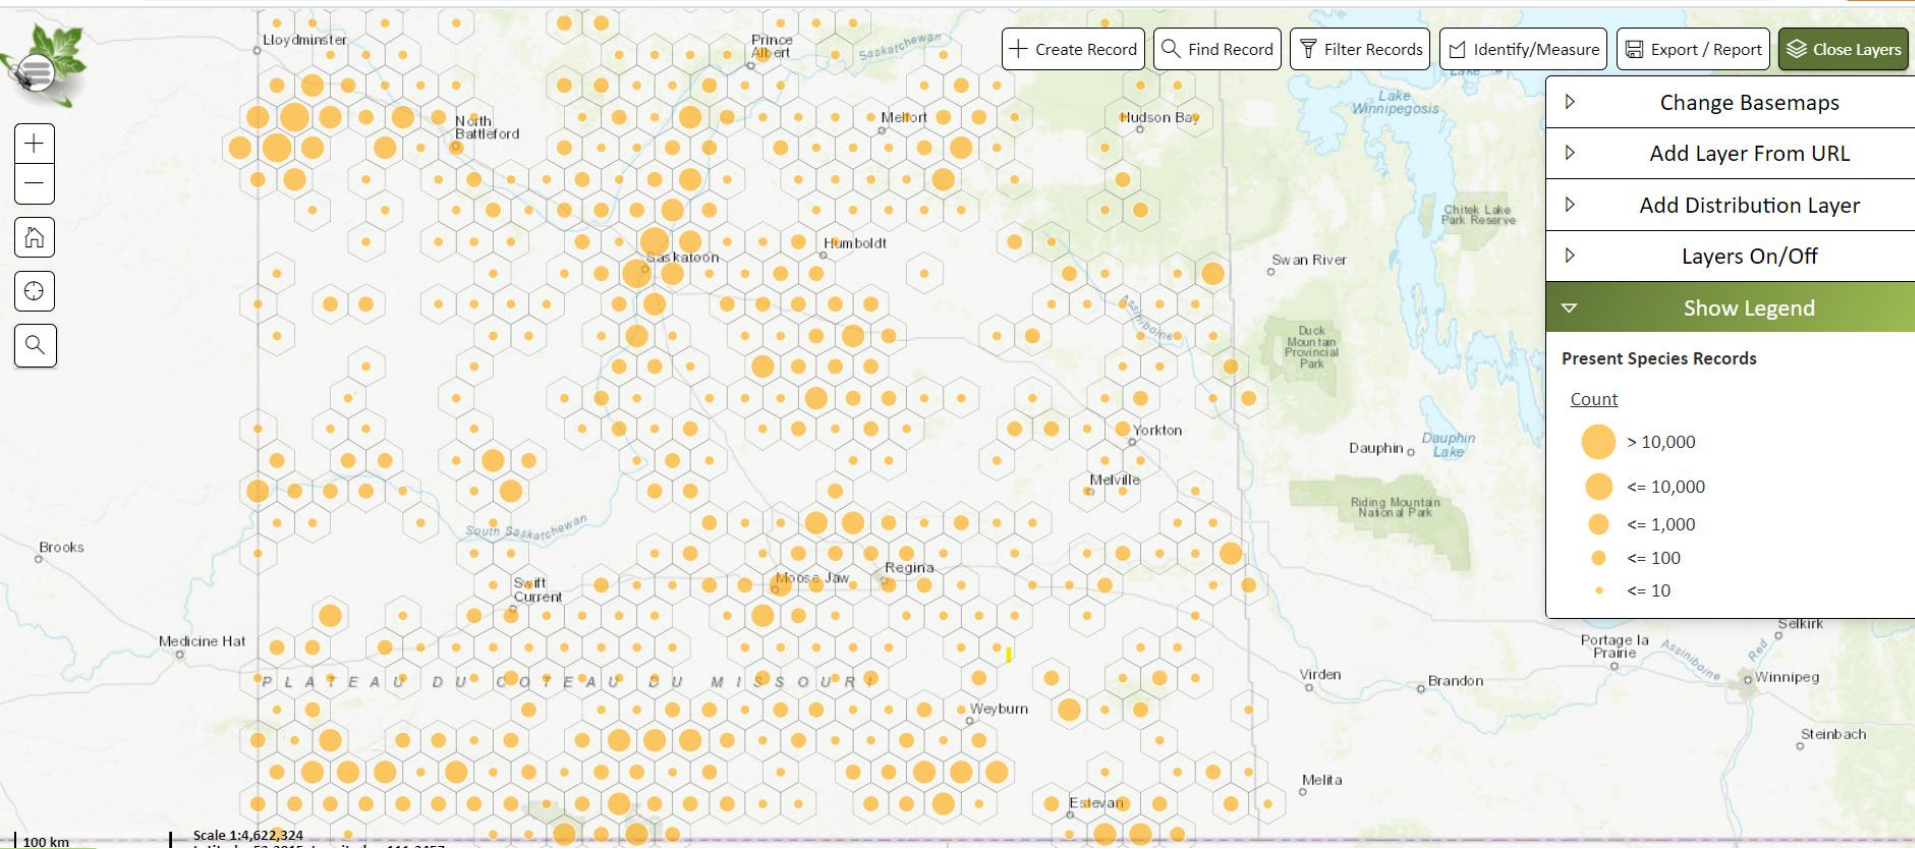

Upload Observation

Use upper left menu bar and select “Upload selected”

Additional Features: Online Map

Can view your own and others observations

imapinvasives.naturereserve.org

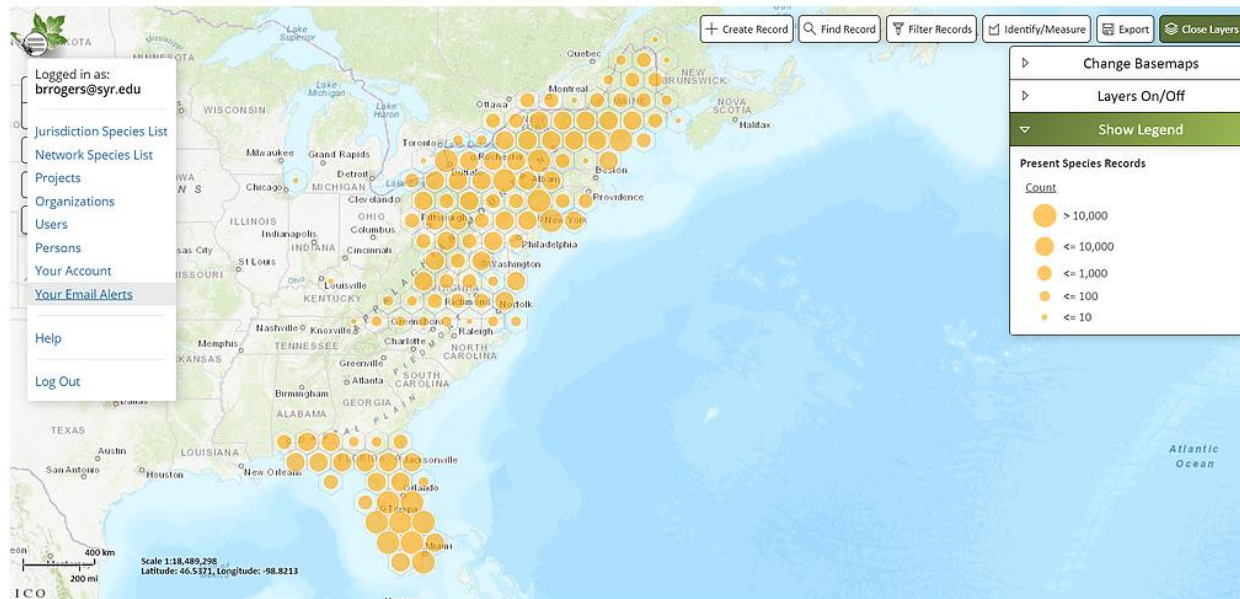

Additional Features: Email Alerts

Email Alerts

[◀ Back to User Manual](#)

iMapInvasives allows any user to set up automatic email alerts. The process for setting up an alert is simple. Once established, email alerts will notify users based on your custom frequency or automatically.

Download the [EMAIL ALERT PDF](#) for more information.

Receive alerts when new observations are uploaded in a specified area (e.g. RM, town)

imapinvasives.org/email-alerts

Help and Resources

The iMapInvasives database was developed as a mechanism for natural resource professionals and citizen scientists alike to track and record information on invasive species. As such, iMapInvasives offers a variety of tools and functions to fulfill this purpose for each of its many users. These resources aid in furthering an understanding of the broad applications that iMapInvasives possesses in regards to invasive species management.

In addition to the main functions provided by the iMapInvasives database, additional resources can be found here on our website to aid registered users in their use of iMapInvasives.

Help resources include:

- our [user manual](#),
- answers to [frequently asked questions](#),
- using iMapInvasives on your [mobile devices](#),
- [help documents](#), and
- [YouTube tutorials](#)

All resources are available to any registered user of iMapInvasives and to those individuals seeking information to become more familiar with the database.

For any specific questions you have that are not answered by the resources provided on our website, please [Contact Us](#).
