

Appendix A is intended to provide general guidance for the acceptable use of federally registered herbicides providing **control** of the target weed. It is the responsibility of the applicant to ensure herbicide treatment is made using eligible herbicides and rates, applied according to the product label and is appropriate for their specific situation. The Saskatchewan Ministry of Agriculture or the Saskatchewan Association of Rural Municipalities are not responsible for the consequences of herbicide application. Always read and follow herbicide label directions.

Industrial herbicides are only for use on industrial sites such as rights of way (road, pipeline, rail), non-irrigated ditch banks, well sites, yard sites, etc. and may not be used in range or pasture land unless indicated.

Range and pasture use herbicides are only to be used on agricultural land and may not be used on industrial sites unless indicated.

If you have any questions, contact the Ministry of Agriculture Provincial Weed Control Specialist at 306-787-4673.

Prohibited Weeds

Prohibited weeds are either not currently in Saskatchewan or are only recently introduced and very rare. For this reason, prohibited weeds may not have registered control options developed in Canada yet. **Herbicide applicators (including producers and other applicants) must apply only eligible herbicide options listed in the current Appendix A to Prohibited Weed Species where they are provided.** If there are no herbicide options listed in Appendix A for application to the Prohibited Weed species of interest, the applicator must consult with the Provincial Weed Control Specialist prior to any application to determine a suitable herbicide option based on registrations or extension recommendations from the United States.

The herbicide option selected must be applied in accordance with Canadian labelled use patterns. Failure to consult will risk the claim being ineligible for rebate. **NOTE - Applicants will be required to submit a copy of the email sent by the Provincial Weed Control Specialist as confirmation of consultation on prohibited weeds and recommendation of the alternative herbicide used.**

The management/enforcement goal for prohibited weeds is to eradicate.

In accordance with The Weed Control Act, municipalities are required to notify Crops and Irrigation Branch upon the discovery of a prohibited weed and at that time an appropriate control option will be investigated and approved. For control options for Prohibited Weeds or assistance in confirming identification, please contact Cory Jacob, Provincial Weed Control Specialist at 306-787-4673 or cory.jacob@gov.sk.ca.

The order of appearance of these products in the following list does not constitute a preference of the use of one product over the other. The products are listed alphabetically. Please select the most appropriate product for the weeds and area being treated.

Table 1. List of Prohibited Weeds in Saskatchewan

Common Name	Botanical Name
African rue	<i>Peganum harmala L.</i>
common barberry	<i>Berberis vulgaris L.,</i>
common crupina	<i>Crupina vulgaris Cass.</i>
curly-leaved pondweed	<i>Potamogeton crispus L.</i>
dalmatian toadflax	<i>Linaria dalmatica</i>
darnel	<i>Lolium temulentum L.</i>
Eurasian water-milfoil	<i>Myriophyllum spicatum L.</i>
field scabious	<i>Knautia arvensis (L.) Coult.</i>
flowering rush	<i>Butomus umbellatus L.</i>
garlic mustard	<i>Allaria petiolata (M. Bieb.) Cavara & Grande</i>
giant foxtail	<i>Setaria faberi Herrm.</i>
giant hogweed	<i>Heracleum mantegazzianum Sommier & Levier</i>
halogeton	<i>Halogeton glomeratus (M. Bieb.) C.A. Mey.</i>
hound's-tongue	<i>Cynoglossum officinale L.</i>
jointed goatgrass	<i>Aegilops cylindrical Host</i>
knapweed, diffuse	<i>Centaurea diffusa Lam.</i>
knapweed, spotted	<i>Centaurea stobe L.(=Centaurea biebersteinii DC)</i>
knapweed, squarrose	<i>Centaurea virgata Lam.</i>
perennial pepperweed	<i>Lepidium latifolium L.</i>
poison hemlock	<i>Conium maculatum L.</i>
puncturevine	<i>Tribulus terrestris L.</i>
red bartsia	<i>Odontites serotina Dum.</i>
saltcedar	<i>Tamarix sp</i>
wild chervil	<i>Anthriscus sylvestris (L.) Hoffm.</i>
woolly cupgrass	<i>Eriochloa villosa (Thunb.) Kunth</i>
yellow floating heart	<i>Nymphoides peltata (S.G. Gmel.) Kuntze</i>
yellow star-thistle	<i>Centaurea solstitialis L.</i>

Table 2. Prohibited Weeds - Eligible Herbicides

Common Name	Eligible Herbicide
common crupina	Navius Flex
	TruRange (<i>range and pasture areas only</i>)
diffuse knapweed	Clearview
	Milestone
	Navius Flex
	Reclaim II (<i>range and pasture areas only</i>)
	Tordon 22K
field scabious	TruRange (<i>range and pasture areas only</i>)
	Clearview
giant foxtail	Reclaim II (<i>range and pasture areas only</i>)
	Arsenal Powerline (<i>bare ground treatments only</i>)
giant hogweed	Esplanade (<i>bare ground treatments only</i>)
	Navius Flex
perennial pepperweed	TruRange (<i>range and pasture areas only</i>)
	Clearview
spotted knapweed	Reclaim II (<i>range and pasture areas only</i>)
	Clearview
	Milestone
	Navius Flex
	Reclaim II (<i>range and pasture areas only</i>)
	Restore II (<i>range and pasture areas only</i>)
	Tordon 22K
TruRange (<i>range and pasture areas only</i>)	
yellow star-thistle	Clearview
	Esplanade (<i>bare ground treatments only</i>)
	Milestone
	Navius Flex
	Reclaim II (<i>range and pasture areas only</i>)
	Restore II (<i>range and pasture areas only</i>)

Noxious Weeds

Noxious weeds are established regionally in Saskatchewan beyond the point of practical eradication (some areas are still free from these weeds). They are also known to be aggressive in Saskatchewan or other surrounding provinces or states.

The management/enforcement goal for noxious weeds is to eradicate small, isolated infestations found in previously uninfested areas as soon as they can be found and to control larger established infestations to prevent spread and to reduce overall impact on the landscapes they infest.

Table 3. List of Eligible Noxious Weeds

Common Name	Botanical Name
absinthe	<i>Artemisium absinthum L.</i>
baby's-breath	<i>Gypsophila paniculata L.</i>
black henbane	<i>Hyoscyamus niger L.</i>
bladder campion	<i>Silene vulgaris (Moench) Garcke</i>
common burdock	<i>Arctium minus Bernh. Subsp. minus</i>
common tansy	<i>Tanacetum vulgare L.</i>
field bindweed	<i>Convolvulus arvensis L.</i>
hoary alyssum	<i>Beretoa incana (L.) DC.</i>
hoary cress	<i>Cardaria spp. (L.) Desv.</i>
leafy spurge	<i>Euphorbia esula L.</i>
ox-eye daisy	<i>Leucanthemum vulgare Lam.</i>
Russian knapweed	<i>Acroptilon repens (L.) DC. (=Centaurea repens L.)</i>
scentless chamomile	<i>Matricaria perforata Mérat</i>
	<i>(=Tripleurospermum perforatum (Mérat) M. Lainz)</i>
white cockle	<i>Silene alba (Mill.) E.H. L. Krause</i>
wild parsnip	<i>Pastinaca sativa L.</i>
yellow toadflax	<i>Linaria vulgaris Mill.</i>

Table 4. Noxious Weeds Eligible Herbicides

Common Name	Eligible Herbicide
absinthe	Clearview
	Milestone
	Reclaim II (<i>range and pasture areas only</i>)
	Restore II (<i>range and pasture areas only</i>)
baby's-breath	Clearview
	Dicamba (<i>Disha 480 and Oracle only</i>)
	Reclaim II (<i>range and pasture areas only</i>)
	Vanquish (<i>industrial areas only</i>)
black henbane	Clearview
	Reclaim II (<i>range and pasture areas only</i>)
bladder campion	Arsenal Powerline (<i>bare ground treatments only</i>)
common burdock	Arsenal Powerline (<i>bare ground treatments only</i>)
	Aspect (<i>industrial areas only</i>)
	Grazon XC (<i>range, pasture, and non-cropland areas</i>)
	Reclaim II (<i>range and pasture areas only</i>)
	Restore II (<i>range and pasture areas only</i>)
common tansy	Clearview
	Escort (<i>up to early bud stage and perennial grass areas only</i>)
	Milestone
	Navius Flex
	Reclaim II (<i>range and pasture areas only</i>)
	TruRange (<i>range and pasture areas only</i>)
field bindweed	Arsenal Powerline (<i>bare ground treatments only</i>)
	Dicamba
	Esplanade (<i>bare ground treatments only</i>)
	Restore II (<i>range and pasture areas only</i>)
	Tordon 22K
hoary alyssum	Clearview
	Reclaim II (<i>range and pasture areas only</i>)

hoary cress	Milestone
	Restore II (<i>range and pasture areas only</i>)
leafy spurge	Arsenal Powerline (<i>bare ground treatments only</i>)
	Aspect (<i>industrial areas only</i>)
	Grazon XC (<i>range, pasture, and non-cropland areas</i>)
	Navius Flex
	Tordon 22K
	TruRange (<i>range and pasture areas only</i>)
ox-eye daisy	Arsenal Powerline (<i>bare ground treatments only</i>)
	Clearview
	Reclaim II (<i>range and pasture areas only</i>)
	Milestone
	Navius Flex
	Restore II (<i>range and pasture areas only</i>)
TruRange (<i>range and pasture areas only</i>)	
Russian knapweed	Tordon 22K
scentless chamomile	Clearview
	Escort (<i>up to four inches only tall or wide</i>)
	Reclaim II (<i>range and pasture areas only</i>)
	Navius Flex
	Milestone
	Tordon 22K
TruRange (<i>range and pasture areas only</i>)	
white cockle	Navius Flex
	TruRange (<i>range and pasture areas only</i>)
wild parsnip	Clearview
	Navius Flex
	Reclaim II (<i>range and pasture areas only</i>)
	TruRange (<i>range and pasture areas only</i>)
yellow toadflax	Arsenal Powerline (<i>bare ground treatments only</i>)
	Aspect (<i>industrial areas only</i>)
	Grazon XC (<i>range, pasture, and non-cropland areas</i>)
	Tordon 22K
